

Alpha & Omega Processing has the prescription for Jennie Stuart Medical Center.

“ Alpha & Omega Processing (AOP) helped Jennie Stuart Medical Center substantially lower processing fees on our rapidly growing electronic transactions. Not only did AOP lower our costs, they analyzed our internal processes and made recommendations to improve workflow and provided new equipment so we could capture electronic payments at all points in the hospital and at off-site locations.

Further, AOP provided new ideas such as recurring payments and enhanced our online payments via our website while making sure we are PCI Compliant. I would highly recommend their services for cost savings as well as improving efficiency in operations.”
